Your Engineering & Welding Partner!

Mission Statement

Our objective is to serve the resistance welding and arc welding manufactures with the best quality machines and systems and to keep our loyal customers at their best in productivity.

Belief Statement

It is our belief that keeping our customers at maximum productivity with long lasting consumables and quality integrated, flexible systems and machines will produce a valuable and profitable situation for both in a win-win arrangement.

Focus Statement

Our focus is on speed. We will provide our information, supplies and equipment at the fastest possible rate because as with all champions and leaders, winning in business is based on speed just as much as it is on quality.

Values Statement

We value your time, and ours, as well as all honorable and good features of life. In this we will maintain the highest morals, ethics and respect for people both internally and externally.

Quality Statement

We will provide the highest "quality to price ratio" for our provided products and services that is possible with the customer's objectives in mind.
